THE SOMETHING AWFUL GOONS AND
OPTICAL INTERNET TRANSLATION GANG PRESENT:

NEO-Novas Aventuras de Megaman Issue "#18"

This release is a collected free-form fan comic created by posters on the Something Awful forums. The original BR Megaman issues were read, enjoyed, and discussed, and the thread quickly decided that if there wasn't an ending, we'll make more (and probably also never end it). Posters began to churn out new pages, the only hint of order being a loose attempt to take turns making pages.

Otherwise, there were no real rules or particular attempt to maintain continuity with either the original comic or the new pages, unless you wanted to. Thread starter Warbird was also kind enough to make per page donations to RAINN, adding up to something around \$800. Note that some pages are animated and/or large (page 26 lol) and may cause hangs/crashes with your software.

Please extract this file in your archive program of choice to see the cool alternate holographic cover, as it is a video file.

There is also a folder full of fanart and extras included!
